Subject: Application for Backend Developer Internship (Java/Node.js)

Dear Hiring Manager & Endava Company,

My name is Le Nguyen Thien Phuc, a final-year Software Engineering student at HCMC University of Technology and Education (HCMUTE). I am writing to express my interest in the Backend Developer Internship position at your company.

Throughout my studies, I have built various academic projects using technologies such as Java Servlet, Node.js, RESTful APIs, MySQL, and Git. I also enjoy solving algorithm problems and improving my coding skills on a daily basis. These experiences have helped me strengthen a solid foundation in backend development and software engineering principles.

What impresses me about Endava is not only the professional working environment but also your focus on continuous learning, mentorship, and personal development. After reading the job description, I believe the role closely matches my skills, interests, and career goals. I'm particularly drawn to the chance to work on real projects with experienced mentors and contribute to meaningful solutions.

I am a fast learner, responsible, and always willing to take on new challenges. I enjoy working both independently and in a team, and I'm excited about the opportunity to apply what I've learned in a real-world environment.

Thank you for taking the time to review my application. I look forward to the opportunity to contribute and grow with your team.

Best regards,
Le Nguyen Thien Phuc
